EXPERIENCE

NATWEST GROUP, EDINBURGH - Technical
Product Manager, Enterprise Engineering
since May 2021

- Managing Goal based pipeline and Application Authorisation Management Product team.
- Automated the process of onboarding users to CI/CD tools and technologies which reduced lead time from 48 hours to 5 mins.
- Delivered Spring Boot Java microservices in event-driven architecture and have deep understanding of the system design.
- Actively involved in decision making of system design and architecture improvements by collaborating closely with customers/SMEs.
- Application Authorisation Management to allow functions/services to communicate effectively with each other.
- Mentored junior engineers and continuously building best practices within the bank.
